PATIENT REMINDERS:

- **Keep** scheduled appointments and give a minimum **24-hour notice** if unable to keep your scheduled appointment.
- **Be prompt** for your appointments. It is important that the dental clinic staff have adequate time to complete care.
- **Follow** dental care recommendations and ask questions about anything you do not understand.
- **Adult patients** are advised that children are not allowed with them during their scheduled treatment time. **Children may not be left unattended in our waiting area.**
- **We look forward to serving you!**
- **Give us feedback** about your visit.

For questions or further information please call (336) 342 - 8273. Someone will be happy to help you!

you don't have
to 
BRUSH ALL YOUR TEETH-
JUST THE ONES YOU WANT TO KEEP.

Regular visits to your dentist help you maintain healthy teeth.

Good oral and dental hygiene can help prevent bad breath, tooth decay, and gum disease.

Home care, oral hygiene:

Brush twice a day for at least two minutes, using fluoridated toothpaste.

Floss daily to remove plaque from places your toothbrush can't reach.

Replace your toothbrush when the bristles become worn or every three months.

Brush up on Baby Care

Top 10 things to know
about your baby's teeth

1. Cavities are caused by bacteria in the mouth that can be spread from person to person.
2. Be sure the entire family sees the dentist regularly to keep a healthy mouth and prevent the spread of cavities.
3. Take your baby to see a dentist for the first time when his/her first tooth comes in.
4. As soon as your baby's teeth come in start brushing with a toothbrush and toothpaste with fluoride.
5. It is safe to use a small smear of toothpaste with fluoride (about the size of a grain of rice) to prevent cavities even though your baby will swallow most of it.
6. Be sure your baby drinks 1-2 ounces of water with fluoride everyday to prevent cavities.
7. Never put your baby to bed with a bottle or cup of milk or juice after his/her teeth come in.
8. When your baby has teeth, encourage him/her to sleep through the night, without feeding him in the middle of the night.
9. Only give your baby 4-6 ounces of juice or less everyday.
10. Encourage your baby to stop sucking his/her thumb, fingers, or pacifier early, by the age 3 at the latest, to prevent orthodontic problems.
